During 1996, the then President elect of HAAOST Mr. George Nikolakakos, has very kindly shared with me some of his thoughts concerning the celebration of the Society's 50th anniversary in the year coming and we have discussed the possible involvement of the Editorial Committee. I proposed then the publication of an index issue of Acta Orthopaedica Hellenica to the years' 1948-1997 that was omitted and therefore the search for old articles was rather unsuccessful even for the persistent ones.

The whole effort was bigger than we have estimated. Dr. Th. Georgantas created the appropriate data base and the editorial committee inserted key words for the articles lacking them. Then Dr. A. Tilentzoglou has undertaken the main effort and with the valuable help of Dr. Th. Georgantas have processed these data appearing in the present issue.

Two issues were prepared, one in Greek and one in English. Each volume was subdivided in two parts. In the first part the issues' 1-23 that represent the period among 1948-1973 were included. In this period, Acta Orthopaedica Hellenica was issued about once yearly, and the published articles represent mainly papers presented at the scientific meetings of the Society. In the second part the issues' 24-48 that represent the period among 1974-1997 were included. During this period, Acta Orthopaedica Hellenica, was issued about four times yearly, while the peer review procedure, was employed for the selection of the submitted papers. Since 1984 one issue of the year was published in English with papers both from Greece and foreign countries, which is a privilege for our Journal and Association.

I would like to express my sincere gratitude to all my colleagues participating in the Editorial Task Force, who worked hardly and timeless, without any complain, and to congratulate them for their efforts in order to complete the job they have undertaken.

This work would never come to an end without the kind donation of SANOFI-SYNTHELABO pharmaceutical company and the personal intervention of Mr. George Soulandros to whom I would like very kindly to extend my deep gratitude.

The present issue is dedicated to the former Editors and the members of the Editorial Committees without their valuable and timeless effort for the publication of the Journal, the present issue would never be possible to appear.
